Reitti coaching offers support in finding a new job

Reitti coaching is designed for jobseekers who benefit from personalised, ongoing support from a coach throughout their job search. Through the programme, you'll gain direct connections to employers that match your profile and have the opportunity to meet them face-to-face.

What does the service include?

Together with your coach, you search for a job that can be tailored to your needs, focusing especially on hidden job opportunities within companies and organisations. During the first four months, you will have weekly contact with your coach. The service provides strong support in finding employment, helps you build new networks, and assists you in gaining access to discussions with potential employers.

The service is suitable for you, if you are committed to:

- developing your job-seeking skills
- meeting your coach regularly
- searching for job opportunities together with your coach and independently between meetings
- starting work accordingly to the employer's preferred schedule.

Meeting locations

- Tampere: Takojankatu 15 A, 33540 Tampere (Kaleva district)
- Other municipalities: the office premises of the employment area

In addition to individual coaching, you will receive tailored support for your needs, for example:

- ready-made CV and cover letter templates for approaching hidden job opportunities
- support in articulating and presenting your skills
- the opportunity to attend employer information sessions at our office in Tampere
- employer information sessions via Teams
- workplace visits
- job-search workshops
- AI tools to help identify suitable employers and make contact
- coaching and practice for job interviews.
